

(3) THE PROJECT PROPOSAL

Please use the space provided and/or a separate piece of paper to elaborate on your organization's specific goals and requirements. The proposal should discuss the philosophy or mission of your organization, the student's potential contributions to the organization, and how that experience will benefit the student. Please include specifics about the exact nature of the student's work, training provided, time commitment, and the amount of written coursework required (daily journals, term paper, timesheets, etc.) Finally, comment on supervision and how their work will be evaluated.
